## ASIO NIGHT VISION GOGGLES

An all-time favorite, TROYA's ASIO is the device everyone thinks of when hearing the phrase "Night Vision". The ASIO is an NVD (Night Vision Device) which, using its in-housed Image Intensifying Tube, allows the user to see during night-time and in low light conditions. The ASIO is equipped with a single objective lens, and two eyepieces, which enables comfortable viewing.

- ⊕ Fits All 18mm Image Intensifying Tubes
- ⊕ MICH/ PASGT Helmets Compliance
- ⊕ Durable and Rugged Design
- ⊕ Mil-Std Compliance
- ⊕ Various Accessories

*\* Asio is a genus of true owls, in the Strigidae family.  
It contains the eared owls, which have feather tufts on the head giving the appearance of "ears".*
